

Dear Parents and Guardians,

I am writing you to ask you to become a partner with me in your student's education this school year. I only have your student in my care for 180 days, and I want to make an impact that will last each child's entire lifetime.

There are many different cultures and beautiful diversities in our community, and each student is different and unique in their own special way with their own learning styles, interests, favorites and dislikes. That said, no one knows them quite like you do! ☺

Would you please help me and take a moment to write about your student? How do you see your student as a learner and a person? What are some things that you know as a parent or guardian that you believe I should know? What is the best way to contact you in regards to your student?

Please feel free to include any questions you have about me or our class in general; I always want to know how you and your student are feeling about the school year, so please let me know! I am looking forward to this school year teaching your student and being a partner in their education and support system with you. Thank you in advance for your cooperation!

Miss Amber Wooten
